

Welcome to FOOMA JAPAN 2009

Noboru Onoe

Noboru Onoe

Chairman
Japan Food Machinery
Manufacturers'
Association

The Japan Food Machinery Manufacturers' Association takes pride in convening FOOMA JAPAN 2009 from June 9 to 12 at Tokyo Big Sight. We have added 11,000 square meters of space for FOOMA JAPAN 2009, the 32nd FOOMA JAPAN exhibition. And we are confident of fulfilling visitors' and exhibitors' highest expectations of FOOMA JAPAN as a leading show of its kind in Asia.

FOOMA JAPAN 2009 opens amid economic concerns caused by the recent crisis on Wall Street and the persistently high prices for crude oil and for raw materials. Also souring the atmosphere have been the repeated revelations in Japan of falsifications of "good until" indications, of illicit substitutions of ingredients, and of instances of contamination. Those revelations have undermined consumer confidence, and they redouble the importance of working through FOOMA JAPAN 2009 to reaffirm the message of food integrity in a convincing manner. This is a time for the members of our industry to assert new ideas and advanced technologies to help regain consumer confidence.

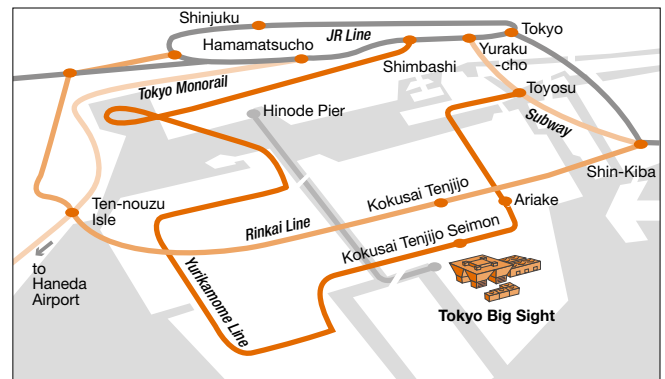

Visitors to FOOMA JAPAN 2009 will encounter a newly broadened range of information technology, in addition to traditional equipment. The exhibitors will present an exciting diversity of technologies, products, and services for addressing multifarious challenges. Those presentations will evoke the exhibition's theme of Delicious Technology. They promise to occasion stimulating and mutually lucrative interchange.

We at the Japan Food Machinery Manufacturers' Association have deployed an unprecedented array of resources in support of FOOMA JAPAN 2009. This exhibition will reward participants with a wealth of business potential. We are doing everything possible to maximize that potential, and I encourage visitors and exhibitors to make the most of this rare opportunity.

Advantages for Exhibitors

New Business!

FOOMA JAPAN 2008 attracted some 118,000 visitors, and we expect even more this year. Most of the visitors express an interest in purchasing equipment or in gathering related information. They include influential members of the food manufacturing and processing industry and of peripheral industries, including chemicals, pharmaceuticals, and even cosmetics. A high percentage of visitors who wield influence on capital spending decisions is a defining characteristic of the FOOMA JAPAN exhibitions.

Industry Insight!

More than 700 exhibitors take part in FOOMA JAPAN, a premier Asian trade show devoted to food manufacturing and processing. The exhibition is therefore a golden opportunity to monitor the latest trends in products and technologies. It is also a valuable chance for exhibitors to share information and explore business opportunities with other exhibitors.

Comprehensive Support!

The FOOMA JAPAN organizers furnish exhibitors with fully one million invitations to distribute to potential visitors. FOOMA JAPAN attracts a large number of guests from overseas, and the organizers accommodate those guests with multilingual materials, interpreting services, and the fully equipped International Lounge.
